固定碟 示意圖/ N-23 FIXED REAR BRAKE DISK

1. 雙面精密研磨的盤面造就出極致的煞車性能，採用日本 410 碟盤專用鋼材，經熱處理增加硬度 HRC 35~38 增加耐磨性。
2. 盤內中間/側邊採黑色ED電著處理提高抗腐蝕，也提供了優良的耐候保護。
3. 側邊切銷溝槽有效提升散熱效果。
4. 推薦搭配 NCY 來令片獲得最佳制動效果。
5. 碟盤厚度4mm，符合國際標準。

1. Precisely double diamond grinding the disk to make the optimum brake performance. Rotor is made of 410 stainless steel, special material for brake disk, from Japan. Heat treatment HRC 35~38, increasing hardness and wear resistance.
2. Disk inner side and outer side with ED treatment to improve the corrosion and wear resistance and get the great weather resistance.
3. Side cutting for better radiating effectively.
4. Attached NCY Brake Pad to get the best braking.
5. Outer thickness 4mm. (for international security standard)
